DETAILED ACTION

Allowable Subject Matter

Claims 1-6 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method of operating an oscilloscope. Each independent claim identifies the uniquely distinct features "selecting a feature within the displayed waveforms that distinguishes the visually distinct waveform from other displayed waveforms", and "automatically deriving a second set of acquisition parameters that discriminate between the selected feature and other features of the displayed waveforms". The closest prior art, Etheridge et al (5,986,637) and Sullivan et al (6,163,758) disclose a similar system, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
